

IN THE CLAIMS:

Please add the following claims:

- (B1)*
43. A method implemented in a data processing system for storing broadcast events for playback at a later time, wherein the data processing system includes a broadcast receiver, the method comprising:
receiving a user identification;
receiving a retention parameter for retaining a broadcast event based on the user identification;
receiving a playback scheduling parameter for scheduling a broadcast event based in the user identification;
receiving a playback format parameter for playing back a broadcast event based on the user identification;
retaining a broadcast event according to the retention parameter;
retrieving a broadcast event according to the playback format parameter; and
playing back a broadcast event according to the playback format parameter.
44. A data processing system for storing broadcast events for playback at a later time, wherein the data processing system includes a broadcast receiver, the method comprising:
receiving means for receiving a user identification;
receiving means for receiving a retention parameter for retaining a broadcast event based on the user identification;
receiving means for receiving a playback scheduling parameter for scheduling a broadcast event based in the user identification;
receiving means for receiving a playback format parameter for playing back a broadcast event based on the user identification;
retaining means for retaining a broadcast event according to the retention parameter;
retrieving means for retrieving a broadcast event according to the playback format parameter; and
playing means for playing back a broadcast event according to the playback format parameter.--
